INTERNATIONAL ERASMUS INTENSIVE PROGRAMME 2009-2011

www.ibi.hu-berlin.de/ipbib

intention

Within the framework of the EU Programme for Lifelong Learning, the intention of this project is to enable Library and Information Science (LIS) students to gain the theoretical and practical skills for necessary, logistical, technological, classification, construction, and security solutions for new library buildings.

concept

Architectural and technological processes are parts of the project discussions, workshops and excursions, as well as specific issues like public relations, information literacy and modern library services.

benefit

The intention of this project is to support efficient and multinational professional training. It enhances the international cooperation among institutions in the areas of teaching, research and practical experience in the field of Library and Information Science.
